Search Notes

Dear Examiner Holzen:

Please find attached the results of your search for 09/970701.

The search was conducted using the mandatory database lists for Business Methods.

These other sources were also used: Internet, STN

If you have any questions, please do not hesitate to contact me.

Thanks for using EIC3600!

Ginger

STIC EIC 3600

Search Request Form

Today's Date:

Priority Date:

For 705 Searches list subclass.

Your Name Stephen Holzen

Is this a Rush? YES NO

AU 3644

Examiner # 78749

SPE's Signature

Room # 3B23

Phone 308 2484

Is this a first action amendment? YES NO

Serial # 09/970,701

Is this a refocus? YES NO

Access #

132416

What is the focus of this search? Please include concepts, synonyms etc.

Attach a copy of the abstract, pertinent claims and your East search strategy. Thanks.

- A method which encourages Recycling by providing a reward for turning in the old product (any product, i.e. glass, plastic)

- Specifically relates to semiconductors, but any electronics/computer/ would be ok to search.

- Dismantling/Disassembling a circuit board, turning in (recycling) the chips (semiconductors) for a reward.

Thrs - Steve

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

Drop off or send completed forms to EIC3600 PK5 Suite 804

Detailed Description

Detailed Description

... or data to perform its specific task. OOP, therefore, views a computer program as a **collection** of largely autonomous components, called

Search Report from Ginger R. DeMille

objects, each of which is responsible for a specific task...The benefits of object classes can be summarized, as follows.

Objects and their corresponding classes **break down** complex programming problems into many smaller, simpler problems.

Encapsulation enforces data abstraction through the organization...is not secure enough for banking applications or anywhere where there may be a financial **incentive** for someone to steal someone's account information. Basic authentication is however the 1 0...streams and high availability (e.g. 24 hour running). In addition close attention must be **paid** to performance as batch systems usually must be processed within strict batch windows.

The design...product, including the product's base price (although this might belong in a Product component), **discounts** and rules for when they apply, and the calculation itself.

One might argue that the...one or more projects to break down.

It's also common for individual projects to **pay** more attention to their requirements and deadlines than to project-wide or enterprise-wide reuse ...

AB- <BASIC> EP 603736 A

In the treatment of washing-out and cleaning water (1) or similar effluents, partic. for vehicle washing units at petrol-filling stations, the water (1) is fed to a flotation stage (2) having floor clearing (3) and whose overflow (4) is passed to an anaerobic treatment stage (5), in which the organic material in the overflow stream is at least partially converted to bio-or sewer gas (6), and whose clear run-off (7) is recycled to the washing and cleaning unit.

USE/ADVANTAGE - Recycling of washing-water, partic. vehicle washing water, and recovery of energy from the organic material via combustion of the biologically generated gas. Environmentally friendly waste water treatment with energy recovery.

Dwg.0/1|

AB- <US> US 5458778 A

A waste water from an automatic car wash is subject to a mechanical flotation treatment (2) using air bubbles (40). The floatation **product** is anaerobically treated (5) to **break down** organic constituents and produce a decompositon gas (6). This gas with waste fuel vapours (14) from associated filling **points** (21) is thermoelectrically converted to provide power and heat for water heating. The flaotion tank bottoms is recycled and heated (16) with make up water back to the car washing heads.

Some part of the suspension in anaerobic stage (5) is withdrawn and aerobically treated (9) for recycling (44) back to the flotation treatment (2).

USE/ADVANTAGE - To treat effluent from automatic car washing machines. The system reduces fresh water and energy consumption, reduces discharges to the environment and **can also dispose of** recovered fuel vapours from associated car fuel filling **points** .

The conveyor system involves the use of twin drum carriages with adjustable boom above the main conveyor line. To enlarge the options

Search Report from Ginger R. DeMille

for transferring between belts at all **points** in the system and thus ensure that the site remains in operation regardless of breakdowns, the system is fitted out with a reversible travelling conveyor (7) mounted on a gantry framework (6) at right angles to the conveying line (arrowed) so as to fit in between the twin drum carriage boom (5) and the line.

Normally the carriages are pulled back and their booms lowered so that load transfer is over a minimum height. When any one production flow line **breaks down**, **product** can be transferred to another line by the transfer carriage and the reversible belt (7). The carriage is approached to the gantry and its boom raised fully. The belt (7) is set on the gantry over the conveyor below so as to take the load from the carriage on the line which has broken down and transfer it to another line which is still functioning correctly. This takes place without interrupting the production flow in any way. Bul. 31/23.8.80.

A methodology for the planning of the disassembly of consumer products

Increasingly, the product life cycle approach to design, development, usage and recovery of consumer products is being adopted around the world. Cost effective recovery of materials, components and clusters of components from the used product is essential to the viability of the life cycle engineering concept. From this stand **point** disassembly is a key cost driver in the post consumer stages of the **products** life cycle. Product **disassembly** costs can be minimised by firstly designing **products** appropriately for later **disassembly** and secondly through the creation of efficient disassembly plans. This thesis concentrates on creation of these plans. As such a planning methodology that tailors the **disassembly** of specific consumer **products** to the available facilities in order to optimise the products recovery value is presented.

In section I the state of the art in disassembly is detailed to the best of the authors knowledge. In section II the disassembly planning methodology is described. This methodology is built in three phases. The first deals with the representation of the **product** from a **disassembly** planning viewpoint. **Disassembly** planning differs from assembly planning in two broad ways. Firstly, complete **disassembly** of **products** is often avoidable, while in the assembly process all components begin as single units. Secondly the nature of sub-assemblies between assembly and disassembly differs. In assembly function tends to dictate sub-assembly creation, while in disassembly end-use compatibility is the driver of sub-assembly creation. Consequently a graphical approach to **product** representation in the **disassembly** plan has been developed. This graph is referred to as the <italic> cluster graph</italic> and a <italic>cluster</italic> is the name given to each sub-assembly found from the disassembly planning viewpoint. This graphical approach enables task data, the basis of all planning processes, to be mapped directly to the **products** structure enabling accurate **disassembly** costs to be extracted

Search Report from Ginger R. DeMille

from the plan.

The second phase of the disassembly planning methodology deals with the minimisation of disassembly operations within the plan. This is referred to as the clustering process and is achieved by optimising cluster sizes within the products structure. The larger the individual clusters within the product, the fewer the number of effective parts that need to be **disassembled** from the **product**, thus reducing **disassembly** cost. The role of the clustering process is to optimise the reduction in disassembly cost against the changes in recovery values of components within the product as cluster sizes change.

Finally the effective parts within the **product** are sequenced for **disassembly**. This is the third phase of the disassembly planning methodology. The optimum sequence of disassembly is found by minimising the non-value-added tasks within the **disassembly** plan. This is achievable since the **product** representation technique described in the first phase of the methodology allows tasks considered to be value-adding and non-value adding to be separated at the beginning of the disassembly planning process.

Section III shows three case studies highlighting differing aspects of the methodology. In section IV, the detailed process design of the three phases of the methodology are shown.

**PERCEPTIONS OF COMMUNICATION PATTERNS IN COMPUTERIZED CLASSROOMS: A
QUALITATIVE EXAMINATION**

This qualitative study explores how computers in the classroom change the student-student and student-teacher communication. It examines the quantity and quality of interaction as well as the barriers and challenges faced by both students and teachers. Research included an extensive literature review, individual focus sessions and field observation.

By allowing students to learn at their own pace, computerized classrooms are particularly helpful for shy, handicapped and second-language students. Furthermore, they foster a greater amount of student-student interaction and cooperative learning which **can** help **break down** socio-economic, ethnic and gender barriers.

Computerized classrooms change the teacher's role from one of dispensing knowledge to one of asking questions and guiding students to discover information. This Socratic-like teaching is unsettling to some teachers who rely on a firm authoritarian atmosphere. Computer-based instruction allows teachers increased one-on-one interaction and those who adapt generally report a more **rewarding** relationship with students.

On the use of the profit rate function in disassembly process planning

Jovane, F; Semeraro, Q; Armillotta, A

Engineering Economist v43n4 PP: 309-330 Summer 1998

ISSN: 0013-791X JRNL CODE: EEC

WORD COUNT: 3438

...TEXT: started, in anticipation of incoming regulations that will charge manufacturers for the disposal costs now paid by the public administrations.

Disassembly is mandatory when recycling complex products such as cars, appliances and office equipment, because it allows materials to be separated that...

...expected from material recovery. Reduction of disassembly costs requires not only the application of special product design rules (design for **disassembly**), but also a careful planning of the process, able to find the most efficient way of **dismantling** the available volume of discarded products .

The **disassembly** planning problem has some aspects in common with the related one in assembly. In principle...

... save time. Moreover, while an assembly plan always results in all parts being joined, a product does not need to be totally dismantled , and the optimal "depth" of a **disassembly** sequence can vary according to the balance of relevant costs and revenues. Although the overall planning goal

...

... manufacturer, the source of discarded products is the manufacturer itself, which already has all the **product** information needed to plan the **disassembly** process; yet, such a center could also treat products of the same family from different...

... not want to set up their own centers. For the recycler and the third-party **dismantler**, **products** to be **dismantled** come from one or more manufacturers, and each of them should provide all relevant technical information to the center owner.

Destination of sorted materials after **dismantling** can vary from internal reuse as spare parts or secondary raw materials (for the manufacturer) to...

... sale of parts and materials, services to external manufacturers. Additional earnings could come from government **incentives** applied as contributions to environmentally conscious company policies.

A dismantling center essentially consists of storage areas for incoming products and sorted materials, and of a main "de-manufacturing" department where **products** are **disassembled**. To get a reasonable **product** flexibility, the **disassembly** area is likely to be arranged into single-operator cells.

PRODUCT DATA

As FIGURE 1 shows, **disassembly** planning needs three basic pieces of information: material data, product description and disassembly process structure...

The relationship between warranty and product reliability
Agrawal, Jagdish; Richardson, Paul S; Grimm, Pamela E
Journal of Consumer Affairs v30n2 PP: 421-443 Winter 1996
ISSN: 0022-0078 JRNL CODE: JCA
WORD COUNT: 7467

...TEXT: problem of distinguishing high from low quality brands.

Akerlof (1970) proposes a theory of how **product** markets **can break down** due to asymmetry in information: as consumers cannot distinguish high from low quality brands, sellers have an **incentive** to cheat by charging high prices for brands that are actually of low rather than of high quality. Consumers, aware of this possibility, mistrust sellers and are unwilling to **pay** high prices for any products because quality cannot be determined pre-purchase. Consequently, only low...

... buyers value high quality, sellers of high rather than low quality brands have a greater **incentive** to inform consumers of the real quality of their products. High quality sellers may inform...

Waste district's recycled art contest awards savings bonds, gifts

LEBANON - The Warren County Solid Waste Management District announced the winners of its fourth annual Celebrate Earth Day! Recycled Sculpture Contest.

A total of 184 students from four school districts created colorful sculptures using recycled materials. The event was open to grades one through 12.

Judging the 32 finalists took place May 5 at the Warren County Fairgrounds in Lebanon.

First-place winners received a \$100 savings bond; second-place, a \$50 savings bond and third-place, a \$10 gift certificate from the Kmart in Springboro.

The winners are:

* First place: "Robosolazzo" by Brandon Brown, Darrick Reed and Travis Appel, third-graders at South Lebanon Elementary; "The Funky Robot" by Vince Coogan, Matt Davis, and Danny Zimmerman, fourth- graders at Butlerville Elementary; "Castle De La Trash" by Chris Spurling and Dorothy Johnson, fourth-graders at Butlerville Elementary; "Dragon Fly" by Emily Hostetter, eighth-grader at Little Miami Junior High; "Flying Aces" by Jessisa McMillian, Franklin High School senior; and "Thundora" by Tiffany Davis and Sarah Combs, Franklin High School juniors.

* Second place: "Moguana" by Phillip Fax and Devin Kilburn, third-graders at South Lebanon Elementary; "Recycle Mobile" by Laura Faulconer, Bailey Kerns, Shayla Bishop and Emily Fiely, fifth- graders at Donovan Intermediate School in Lebanon; "Recycle Man" by Will Johnson, fourth-grader at South Lebanon Elementary; and "Kaleidoscope" by Ryan Hostetter, Little Miami High School junior.

* Third place: "The War Chopper" by Kyle McGrew, Mary Ash, Zack Amis and Chris Hartley, fifth-graders at Donovan Intermediate School in Lebanon; "Long Neck" by Nichole Rutherford, fourth-grader at South Lebanon Elementary and "Shattered Life" by Rachael Fulz, Franklin High School junior.

The Plastics Recycling Div. of the Society of Plastics Engineers named Evergreen Nylon Recycling, the world's largest commercial nylon recycling venture, as "Recycler of the Year."

A joint venture of Honeywell International and DSM Chemicals North America, Evergreen Nylon Recycling uses a jointly developed, patented technology that converts post-consumer nylon 6 carpet and other nylon 6 wastes into caprolactam, the raw material used to make nylon 6. Type 6 nylon is used in such applications as residential and commercial carpet, engineering plastics, automotive parts, sporting goods, films and packaging.

Evergreen's \$100-million facility, which began operation in November 1999 in Augusta, Ga., can produce up to 100-million lb of caprolactam annually with the same quality and performance as virgin caprolactam. The plant keeps up to 200-million lb of nylon 6 waste out of U.S. landfills each year, 140-million lb of which is post-consumer carpet. That's enough carpet to stretch from Atlanta to San Francisco and back again.

The Society of Plastics Engineers is a 35,000-member organization dedicated to providing knowledge of plastics and polymers worldwide. The Society's Plastics Recycling Div. aims to educate the plastics industry and consumers of plastics through various educational efforts. For more information, visit www.4spe.org.

Two teens charged in spray painting incidents

Two 16-year-old boys have been arrested for spray painting "gang- related symbols" on two church vans and a grocery store wall in October, said Rock Hill police.

The boys, who are being charged as juveniles, spray painted graffiti on the outside wall of the West Main Street Food Lion and on two vans owned by Rawlinson Road Baptist Church, police said.

The teens were arrested last week and have been charged with malicious damage to property and criminal conspiracy, according to reports. Teen caught with box cutter at school charged

A 13-year-old boy was arrested Monday after school officials found a box cutter in his pants pocket, Rock Hill police reported.

The teen-ager is a student at the Rebound program at the Worthy Boys and Girls Camp, southeast of Rock Hill near Lesslie. The program operates as an alternative school for the Rock Hill school district.

Officials found the box cutter while performing a routine pat- down of the Rebound students.

The 13-year-old was charged as a juvenile with carrying a weapon on school grounds and released to a family member, according to reports.

Clover man sentenced to 10 years

COLUMBIA - A federal judge sentenced a Clover man to 10 years in prison after he pleaded guilty to possession of a stolen firearm.

Grover Carroll "Johnny" Gibson, 39, also was sentenced to three years of probation Monday in federal court, according to a press release from the U.S. Attorney's Office in Columbia.

The prosecutor handling the case could not be reached for comment, and the release did not detail Gibson's crime. Spratt to discuss legislation on TV

U.S. Rep. John Spratt, D-S.C., will join television personality Bill Curry on Dec. 19 to discuss legislation considered by Congress in 1999.

The program will air at 3 p.m. on WNSC-TV, Channel 30. The program originally was scheduled to air Sunday but was postponed because of a public television fund-raiser. Tega Cay to celebrate Arbor Day on Friday

TEGA CAY - Arbor Day will be celebrated at 7 p.m. Friday at Tega Cay City Hall.

Don McSween, an arborist with the city of Charlotte, will speak on tree selection and maintenance in the Piedmont.

A tree planting will be held earlier in the day and shown on video at the celebration.

Refreshments will be served by the Beautification Committee of Tega Cay.

Recylers win prizes on American Recyles Day

COLUMBIA - Several local residents won big because they pledged to support recycling.

The biggest winner was R.L. Bagwell of Rock Hill, who won a one - year lease to a 1999 Ford Mustang in a drawing held in honor of America Recycles Day, said a spokesman for the S.C. Department of Health and Environmental Control on Wednesday.

Bagwell and the other winners signed challenge cards promising to recycle in their homes and buy recycled products from the store.

Ebinport Elementary School of Rock Hill was named Recycling School of the Year and received 25,000 sheets of recycled content paper.

Other local winners included:

* James Traynor of Fort Mill, who won a two-night stay at the Cypress Inn in Conway.

* The Huffman Family of Rock Hill, who will receive a \$250 savings bond.

Abstract (Article Summary)

Joan Franks, former buyer of Joan Franks Women's Specialty Store, has left the store and opened Joanie's, a new designer fashion store for women at 540 Mendenhall at Mendenhall Commons.

The selection will include Halston evening wear by Kevan Hall. The designer, who created evening wear for Halston as an assistant, recently replaced Randolph Duke as chief designer. The store has one beaded black fishtail gown now with a matching shrug (an easy, abbreviated sweater) by Hall. Franks said there will be a good selection from Hall's spring line that should arrive in March.

[Gail] Mathes called Franks "wonderful and very talented," but Mathes plans to take the specialty store at Laurelwood Shopping Center in a new direction. This fall it added Donna Karan's top line, she said, and will offer more from Yeohlee Teng, a designer known for elegant, architecturally designed coats and sportswear. It will continue offering Le Collezioni by Armani, his second line.

Sense of Style

Joan Franks, former buyer of Joan Franks Women's Specialty Store, has left the store and opened Joanie's, a new designer fashion store for women at 540 Mendenhall at Mendenhall Commons.

The store, which opened Monday, offers the kind of fashions Franks is known for - gorgeous fabrics and designs that may be beautifully understated or unusual and artistic.

The selection will include Halston evening wear by Kevan Hall. The designer, who created evening wear for Halston as an assistant, recently replaced Randolph Duke as chief designer. The store has one beaded black fishtail gown now with a matching shrug (an easy, abbreviated sweater) by Hall. Franks said there will be a good selection from Hall's spring line that should arrive in March.

Franks, who has been a leader in Memphis fashion for more than 30 years, said she left the specialty store because of "differences in management philosophy." But the store will continue to use her name.

"We believe we own the use of the name," said Gail Mathes, a Memphis trial lawyer who owns the store with Mimi Bowen of New Orleans. "We have it as a trade name."

Mathes called Franks "wonderful and very talented," but Mathes plans to take the specialty store at Laurelwood Shopping Center in a new direction. This fall it added Donna Karan's top line, she said, and will offer more from Yeohlee Teng, a designer known for elegant, architecturally designed coats and sportswear. It will continue offering Le Collezioni by Armani, his second line.

Visitors to the specialty store in recent years may have discerned a split personality in the selection. Romantic, artistic, draping outfits were offered alongside contemporary sportswear and sexy, little evening dresses. It was hard to imagine the same customer buying both looks.

Mathes said the store plans to keep its romantic fashions, but will aim more at the professional woman. The designs will better serve a woman "who doesn't have to dress up all the time, but still wants special clothes that make a distinctive statement," she said.

Franks, who is both the buyer and a partner in Joanie's, said a few fashions there will be sold only at Joanie's, and some will be exclusive to Joanie's within the city.

The selection includes a queenly empire waist Renaissance style velvet gown with brocade sleeves (\$990) and a glamorous fishtail velvet dress with draped neckline (\$860) by Jane Boone.

Elegant two-piece outfits with tunic and pants or skirt by Ronaldus Shamask feature asymmetrical seams subtly underlined with beads. One was priced at about \$1,000. But there are also less expensive outfits, including an unusual, oriental-styled chenille cloak with a damask pattern (\$200) from Aug. 27 A.M.

The 3,050 square-foot store, on the site of a former travel office, is decorated in a neo-classical motif with columns, hand-painted screens, antique furnishings and dressing rooms draped in silk.

There are also gift items, including hand-painted, bead-fringed pillows, antique perfume bottles and unusual candles.

"I feel so excited, I'm out of my mind," said Franks. "I'm finally getting to do something in the most wonderful way and plan it exactly the way I feel the customer will enjoy it."

MAC for Memphis

MAC Cosmetics, the company that caused such a buzz when it opened its first New York store in 1991, is finally going to sell its makeup in Memphis. The MAC counter will officially open Friday at Goldsmith's store at Oak Court Mall. The event will be marked with music and makeovers from 6 to 9 p.m. Friday and noon to 3 p.m. Saturday.

Make-up Art Cosmetics was founded in Toronto in 1985 to develop products for makeup artists. But it wasn't long before models, photographers and actors caught on to the line and made it the hip makeup for the beautiful people. MAC, now sold in 180 locations around the world, keeps up its cool image by using minimal packaging, no advertising and no promotions.

MAC offers seven formulas of lipsticks and 140 shades. Lipsticks are \$13.50 each; foundations \$18 each; and Studiofix, a popular powder plus foundation in a compact is \$19.50 each. MAC's spice lip pencil, sometimes called the perfect neutral brown (\$10.50), was recently listed in Allure magazine's hall of fame for beauty icons.

At all MAC locations, the entire selling price of Viva Glam lipstick, a brownish red modeled in advertising by female impersonator Ru Paul, is donated to local AIDS services. The Back to MAC program rewards recycling by offering a free lipstick with the return of empty plastic MAC containers.

Campground opens Sept. 4

Lake Elsinore Recreation Area, 32040 Riverside Drive, will be open for day use and camping beginning Sept. 4. The campground offers shaded areas with many full hook-ups and public and private launch facilities for boat and watercraft use. Recreational amenities include sunning, wading and fishing.

Camping spaces will be allotted on a first-come, first-served basis. Reservations will not be accepted. Fees are \$20 for RV sites. Tent sites with no hookups are \$15; electricity is \$5 extra. Day use fees are \$5 per vehicle and \$2 per person walk-in. Information: 674-3124.

Concert at library slated

Temecula Acoustic Music Society, a nonprofit organization, will present a concert Aug. 29 from 3 to 5 p.m. at Temecula branch library at 41000 County Center Drive.

Featured performers will include composer Daniel Stoermer, who will perform his recent compositions, and recording artist John Langdon, performing music from his first CD and a number of his latest originals. There is no charge.

Sponsors sought

Sponsors are needed for the City of Lake Elsinore used oil recycling event Aug. 22, which will coincide with the Storm baseball game and fireworks show at the Diamond. Prizes, recycling information and kids' projects will be featured. Call 674-3124, Ext. 246.

Cheesemobile to appear

In association with the Lake Elsinore Storm, the California Milk Advisory Board, representing 2,300 dairy farmers throughout California, and its Real California Cheesemobile, will roll into Lake Elsinore at the Diamond at 7:15 p.m. Aug. 20 and 21 to raise money to benefit the Assistance League's Operation School Bell Program. This program is set up to clothe underprivileged children and for local community causes and charities throughout the area from April through August.

The cheesemobile will also appear at Vons market, 31564 Grape St. in Lake Elsinore from 10 a.m. to 1 p.m. Aug. 21 to distribute samples of Real California cheese and a chance for contestants to test their pitching speed and accuracy. Participants will be asked to donate \$1 to the Assistance League for the challenge.

Center seeks volunteers

The City of Lake Elsinore Senior Activity Center needs volunteers to spend two to three hours in the morning for one or more days a week to answer phones in the office, help in the kitchen or other perform miscellaneous tasks. Information: 674-2526.

Items for community notes should be submitted in writing to Myrna DuVall to: The Press-Enterprise, 31900 Mission Trail, Suite 130, Lake Elsinore, Ca. 92530. When submitting information by mail, please include name of contact and phone number. Deadline for items is one week before publication date. Items may also be faxed to 245-2936.

(Copyright @ The Hartford Courant 1997)

– Today is your last change to correctly identify all 12 birds nesting inside local stores for a prize.

The birds were placed inside the stores by the Glastonbury Chamber of Commerce and local Realtors in celebration of Earth Day.

"It's not often that you will see an eagle nesting inside of a building," said Jane Hendricks, the chamber's program coordinator.

Prizes will be given to people who locate and name all the birds at 2 p.m. Saturday at the park at Hebron Avenue and Main Street.

Residents should not be afraid to ask for help if they don't know the name of the birds, Hendricks said.

The purpose of the event is to show the public that local Realtors are "earth friendly," Hendricks said.

The participating stores are: Glastonbury Stationers; Ooh's & Oz; Dow Quality Interiors, on Hebron Avenue; Emmy Lou's LTD; Daybreak Coffee Roasters; Photo Graphics; Village Wool; Katz Hardware and The Main Frame and Art Gallery all on Main Street; Hawk Framing, on Water Street, Melzen Farm Supply on Oak Street and Village Craft Gallery on Main Street in South Glastonbury.

At Emmy Lou's, for example, the store's owner encourages customers to recycle their shopping bags.

And coffee drinkers at Daybreak are given a discount if they used recycled mugs. Photo Graphics recycles its film canisters and film and participates in a silver recovery program, Hendricks said.

AUBURN TOWNSHIP**AT&T PLANS TOWERS**

Representatives from AT&T will attend the Feb. 3 trustees meeting to discuss their plans for communications towers in the township. The township now has two towers, but AT&T wants to put up towers in 15 additional locations in Geauga County.

Trustees also discussed whether the Citizens Against Unfair School Taxes should have been charged \$50 for renting the town hall for a meeting. The discussion centered on whether the organization is a private interest group or a community group. Community groups normally are not charged for use of the town hall. A decision on the charge is expected at the next meeting.

AURORA**BREAK ON TRASH FEES**

The City Council gave preliminary approval Tuesday to exempting residents 62 and older from paying collection fees for recyclable materials.

Before approving the legislation, the council is expected to consider setting a minimum income to qualify for the exemption. The council has introduced another ordinance that would exempt the same age group from paying trash collection fees as well.

Also on Tuesday, council members agreed to place on the May ballot a 1.3-mill fire levy for emergency medical service to replace an existing one due to expire.

BAY VILLAGE

EROSION CONTROL WORKSHOP

A workshop on the state's proposed erosion control program will begin at 10 a.m. tomorrow at the Dwyer Memorial Senior Center, 302 Bryson Lane.

The workshop, hosted by Mayor Thomas L. Jelepis and the Bay Village Lakefront Erosion Committee, will focus on how to complete an appeals form to the Ohio Department of Natural Resources by the Feb. 4 deadline.

The meeting, expected to last until about 2 p.m., is open to residents of Bay Village and other lakefront communities.

In other city news, the grand opening for the Bay Fitness Center is scheduled for 7 p.m., Monday at Bay Village High School, 29230 Wolf Rd. The council is holding a public committee meeting that same night at the school.

CLOVERLEAF SCHOOLS

STUDYING SEWER OPTIONS

Kohanski Architects gave the Cloverleaf Board of Education options for sewer systems for the proposed recreation center.

The costs range from \$100,000 to \$200,000 for upgrading the existing sewage facilities or up to \$350,000 for constructing a new sewage treatment plant.

The school district also could tie into the Westfield sewage system, an option that would allow the district unlimited growth. This option could cost as much as \$240,000 plus tap-in fees.

The board plans to further research its options before making a decision.

CUYAHOGA COUNTY

WINTER CLOTHES NEEDED

Three shelters serving the homeless are collecting gloves and other winter clothing, which are in short supply. Social service workers report seeing many homeless people risking frostbite for lack of gloves.

Brian Davis, director of the Northeast Ohio Coalition for the Homeless, said, "because it snowed so early this winter, it has been difficult for service providers to keep up with the needs of the homeless community. They have exhausted supplies of winter apparel."

Donations are being accepted at these shelters: West Side Catholic Shelter, 3135 Lorain Ave., call 631-4741; City Mission, 5310 Carnegie Ave., call 431-3515; and Bishop Cosgrove Center, 1736 Superior Ave., call 781-8262.

CUYAHOGA FALLS

SERVICE COMPLEX SITE

The City Council Finance Committee on Tuesday discussed purchasing property at Bailey and Riverway roads for an expansion of the service complex to store city vehicles. The property would cost \$330,000 to be paid over two years.

The council's public improvements committee discussed a \$22,000 contract for architectural services for restoration of the shore at Water Works Park.

The council is expected to vote on both issues Monday.

FAIRVIEW PARK

ATMs NEED CAMERAS

City Council has adopted an ordinance requiring financial institutions with outside ATM machines to have surveillance cameras. The move is in response to an abduction last year of a school custodian who was taken to an ATM machine and forced to withdraw money. Violation of the new ordinance is a first-degree misdemeanor.

The council also approved Mayor Karl Kubb's appointment of James M. Kennedy of North Olmsted as director of public service and development. In November, the council refused to confirm the mayor's first choice for the job.

GARFIELD HEIGHTS

TEST SCORES GET BETTER

Proficiency test scores have been showing steady improvement, especially for students who retake exams after failing them the first time, school officials say.

Scores for 328 eighth graders taking ninth-grade proficiency tests this year show a 39 percent rate of passing, up from 31 percent last year. Passing rates for math increased from 51 percent to 62 percent and reading from 78 percent to 87 percent. Passing rates for citizenship declined from 68 percent to 62 percent and writing stayed the same at 58 percent.

James Wilkins, coordinator of curriculum instruction, said increasing the passing rate of 18 percent in 1990 to 39 percent this year is attributed to the school district's aggressive tutoring program aimed at higher test scores.

GLENWILLOW

FIXING PHONE LINE

Residents recently reported problems calling Village Hall. Officials said phone company crews found a cracked cable, which was being replaced this week.

Mayor Donald Payne said the BFI landfill, which is being phased out, will be open mainly for construction and demolition debris through Jan. 18, 1998. BFI also got a temporary permit from the Ohio EPA to allow certain municipalities to dump garbage there through April. BFI can receive a maximum of 300 tons per day.

KENT SCHOOLS

PAY RAISES GRANTED

The board of education has given schools Superintendent Marc Crail a 2.38 percent pay increase, boosting his annual salary to \$82,972. Treasurer Deborah Krutz has received a 5.38 percent hike, to \$59,170 annually.

The board also hired a construction management company to oversee the building of the district's new middle school. The Quandel Group Inc. of Columbus will be paid \$568,000 for a 20-month period. Voters in November approved a \$21.8 million bond issue to finance the building of a \$16.2 million middle school and other school improvements.

In other school news, the district has applied for an Ohio Arts Council grant to hire a poet for the next school year.

HUDSON

COMMITTEE ON DEER

The council established a 10-member, committee to figure out what to do about the growing deer population in the city. Its first meeting will be at 7 p.m. Monday at the Safety Center in the EMS training room. Officials cited the rising number of deer accidents and complaints about the deer destroying foliage.

LAKE COUNTY

LAKETRAN OFFERS TOUR

The Laketrans board wants Mentor residents who live near the proposed park-and-ride facility at Ohio 2 and Ohio 306 to see how Laketrans operates.

The board has sent 500 invitations to selected residents to tour the system's Painesville Township garage and administration building Feb. 12, ask questions and listen to consultants who said the controversial facility's impact will be minimal if Laketrans provides road upgrading.

Former Willowick Mayor Donald Fitzgerald is new board chairman and former Mentor schools bus manager Harry Waterman is vice chair for the next year.

LAKEWOOD

COMPUTER FOR POLICE UNIT

The city has received a \$15,433 federal grant to expand computer capabilities of the police investigative unit. The city will provide \$1,714 in local matching funds.

The human service department got a \$58,340 block grant to implement a "Just Friends" mentoring program and expand H2O (Help to Others) at Lakewood middle schools. "Just Friends" encourages greater parental involvement in children's lives, nurtures relationships and helps teens establish goals.

Also, Donald G. Sharp, a Lakewood resident for 19 years, has been appointed to the city planning commission.

In the aftermath of a recent fire at the Lake House high-rise condominiums, Councilwoman Nancy Roth asked if the city should beef-up its fire prevention efforts. Fire Marshal Scott Gilman said the department routinely inspects the Gold Coast buildings, and the Lake House was scheduled to be inspected after installation of its new smoke detection system.

MAYFIELD SCHOOLS

MILLRIDGE PRINCIPAL RETIRES

Robert Huntley, principal of Millridge Elementary School, will retire Feb. 21 after 30 years in the Mayfield school district.

He also has been principal of the now-closed Mayfield Road elementary and the middle school. Before that, he was a teacher and principal in the Garrettsville school district.

For the rest of this school year, Lou Kindervater, principal of the Millridge Center for the Hearing Impaired, will also be principal of Millridge Elementary, Superintendent David Abbott announced.

MEDINA COUNTY

ANNUAL SEEDLING SALE

The Medina County Soil and Water Conservation Board is holding its annual sale of trees and seedlings. This year's selection includes evergreen, hardwood shrubs, ground covers, wildflowers, tree protectors and wildlife habitat boxes. For information, contact the district at 803 E. Washington St., Suite 160, Medina, or call 722-2605.

MONTVILLE TOWNSHIP

ZONING APPEALS DELAYED

The Montville board of zoning appeals meeting adjourned early after former zoning inspector Pat Ryan told board members the notice for the meeting had been improperly placed in a Medina County newspaper.

Waterford Properties, at 3960 Medina Rd., had requested a variance from the board, but the published information contained errors. The meeting was rescheduled for Feb. 10.

MUNSON TOWNSHIP

RECYCLING CONTRACT AWARDED

Waste Management of Ohio was awarded a contract for a recycling program that will take place tomorrow at the Vetter baseball field parking lot.

NORTHFIELD CENTER TOWNSHIP

LAND PURCHASE OK'D

Trustees on Wednesday approved the \$155,000 purchase of 16 acres on Olde Eight Rd. for road department buildings.

The site, between Brandywine Creek and Interstate 271, has 11 usable acres and five acres of wetlands. The township will build a road into the property, which will have a 3,000-square-foot storage building and a 4,600-square-foot service garage.

The purchase has been discussed for four years.

ORANGE

DEVELOPER PRESENTS PLANS

Developer Randy Kertesz presented the planning and zoning commission an overview of his plans to build homes and condominiums on one of the largest undeveloped tracts left in the village.

The 165-acre, partly wooded tract known as the Parker/Young property is bounded by Brainard Rd. to the east, Miles Rd. to the south and U.S. 422 to the west. Kertesz wants to build 43 single-family homes and 108 condominiums on the site, which has a pond. He would leave 65 percent of the property open space.

The commission took no action.

SEVILLE

PARK AVE. CHANGE SOUGHT

A public hearing was held last week on developer Stanley D. Scheetz's request for a zoning change to allow multifamily housing on about eight acres on the north side of Park Ave. West that is now zoned highway

commercial.

Scheetz wants to build three sets of condominiums that would contain between 90 and 100 units. Scheetz said that at least 75 percent of the units would be owner-occupied. Scheetz also owns the Park Ave. West Condominiums just west of the site.

Scheetz has requested changes in the land use three times before but has been denied each time, according to Mayor Jean Jamison.

Council is expected to vote on the zoning issue at its next meeting Feb. 10.

SOLON

PARKING PROBLEM REMAINS

City Council has, in effect, tossed back to the school board the controversy over students parking on streets near Solon High School.

Council declined to take action this week and sent back to committee "for further study" a proposed ordinance that would have set two-hour parking limits on Brookland, Arbordale and Copley avenues and Solon Blvd.

"This is a school problem," Councilman Kevin Patton said. "These cars should be {parked} over at the high school." Some nearby residents have complained for weeks to both City Hall and the school board about cars parking on the streets while construction is under way on a high school addition.

LEASE-PURCHASE OK'D

Council approved the city's lease-purchase of a \$154,000 home at 6629 SOM Center Rd. The city intends to raze the house to make room for a new library at the north end of Community Park.

Council also accepted a vendor's bid of \$448,529 for a computerized dispatch system for the police and fire departments. Delivery and installation are expected within 90 days. A new police station is to open this spring:

STRONGSVILLE

MEETING TO DISCUSS DEER

The city will hold a town meeting at 7 p.m. Wednesday to talk about problems residents are having with deer.

City officials have invited representatives from the Ohio Department of Natural Resources and the Metroparks. The meeting will be at City Hall.

The village of Waynesville may deserve a prize for coming up with the most unusual use of a Recycle, Ohio! grant.

The usually quiet community of 2,000 intends to train two or three police officers so they can better counsel against littering among the 100,000 visitors to Waynesville's annual Sauerkraut Festival.

"It's a major problem during that time," Village Administrator Kevin Harper said. "You'd be surprised how many people drop their trash on the ground and don't even think about it.

Waynesville is among five Dayton-area communities receiving grants this year from the Recycling and Litter Prevention Division of the Ohio Department of Natural Resources.

Franklin Twp. in Warren County, Beavercreek, Huber Heights, Tipp City are the other area grant recipients.

The Recycle, Ohio! grants are awarded each year to help local communities develop waste reduction, recycling collection, recycling market development and litter-prevention programs.

Waynesville's grant is a relatively small \$870. Harper said the money will pay for police officer training that includes how to counsel against littering and how to write citations if necessary.

In nearby Franklin Twp., Vince Ross, township administrative assistant, said a \$14,416 grant will be matched with \$7,000 in local funds to buy playground equipment made of recycled materials.

Ross said the equipment will be installed in Franklin Twp. Park on Ohio 122, the Franklin Heights subdivision park on Ohio 73 and a small park off of Kaye Street in the Carlisle area.

Equipment for each park will include two spring-powered riding animals, one rainbow climber, one swing set and one spring-powered seesaw. A fire engine climber will also be installed at the park.

All of the equipment will be made of recycled plastics, aluminum and steel - and all will bear signs saying so.

"We have two collection points in the township for bringing in recyclable materials. We want to use this to show people what is happening to the recyclables," Ross said.

Tipp City also is focused on making use of recycled materials.

City Manager Jim Dando said Tipp City's \$7,742 grant will be used to buy 14 trash containers made of recycled milk jugs and aluminum.

The containers, which will be divided into four compartments, will be placed in Tipp City's downtown City Park and in new Kyle Park at the southeast edge of town.

Huber Heights City Manager James Pierce said his city's \$14,910 grant will be used to deal with the results of people doing the wrong thing.

The city intends to hire a \$7.50-an-hour intern who will oversee a cleanup and enforcement program.

Beavercreek is receiving a \$5,000 grant, but it will actually benefit the Beaver Creek Wetlands.

City Manager Dan Dubruiel said the funds will be allocated to the Beaver Creek Wetlands Association, which will use the money with local matching funds to purchase recycled plastic logs for construction of elevated footpaths into the wetlands.

The village of Waynesville may deserve a prize for coming up with the most unusual use of a Recycle, Ohio! grant.

The usually quiet community of 2,000 intends to train two or three police officers so they can better counsel against littering among the 100,000 visitors to Waynesville's annual Sauerkraut Festival.

"It's a major problem during that time," Village Administrator Kevin Harper said. "You'd be surprised how many people drop their trash on the ground and don't even think about it.

"Managing that many people is a heck of a challenge for a small town; and we just don't have time to go around and pick up after them."

Waynesville's grant is a relatively small \$870. Harper said the money will pay for police officer training that includes how to counsel against littering and how to write citations if necessary.

Waynesville is among five Dayton-area communities receiving grants this year from the Recycling and Litter Prevention Division of the Ohio Department of Natural Resources.

Beavercreek, Huber Heights, Tipp City and Warren County's Franklin Twp. are the other area grant recipients.

The Recycle, Ohio! grants are awarded each year to help local communities develop waste reduction, recycling collection, recycling market development and litter-prevention programs.

Beavercreek is receiving a \$5,000 grant, but it will actually benefit the Beaver Creek Wetlands.

City Manager Dan Dubruiel said the funds will be allocated to the Beaver Creek Wetlands Association, which will use the money with local matching funds to purchase recycled plastic logs for construction of elevated footpaths into the wetlands.

Dubruiel said Beavercreek applied for the grant on behalf of the wetlands association because the city recognizes the value of giving people access to the wetlands.

"It will help people understand the value of this kind of resource," he said. "It's a good educational tool, certainly something to be used by students for environmental education purposes."

In nearby Franklin Twp., Vince Ross, township administrative assistant, said a \$14,416 grant will be matched with \$7,000 in local funds to buy playground equipment made of recycled materials.

Ross said the equipment will be installed in Franklin Twp. Park on Ohio 122, the Franklin Heights subdivision park on Ohio 73 and a small park off of Kaye Street in the Carlisle area.

Equipment for each park will include two spring-powered riding animals, one rainbow climber, one swing set and one spring-powered seesaw. A fire engine climber will also be installed at the park.

All of the equipment will be made of recycled plastics, aluminum and steel - and all will bear signs saying so.

"We have two collection points in the township for bringing in recyclable materials. We want to use this to show people what is happening to the recyclables," Ross said.

Tipp City also is focused on making use of recycled materials.

City Manager Jim Dando said Tipp City's \$7,742 grant will be used to buy 14 trash containers made of recycled milk jugs and aluminum.

The containers, which will be divided into four compartments, will be placed in Tipp City's downtown City Park and in new Kyle Park at the southeast edge of town.

Dando said the containers will be compartmentalized so that park users can sort their trash for recycling as they dispose of it.

"Then our people will be able to take out the separate bags and recycle the right materials at the county recycling center," he said. "That's what people want. They want to be able to do the right thing easily."

Huber Heights City Manager James Pierce said his city's \$14,910 grant will be used to deal with the results of people doing the wrong thing.

The city intends to hire a \$7.50-an-hour intern who will oversee a cleanup and enforcement program focused on outlying rural areas of town.

Pierce said those areas are periodically used as dumping grounds by people who unfortunately decide to take advantage of their isolation.

"This will help deal with that," he said. "We will be able to do cleanup and enforcement throughout the city, and particularly in those outlying areas."

Abstract (Article Summary)

The Board of Directors of the Cambridge Chamber of Commerce has unanimously voted to endorse an all-inclusive parade proposed by the Cambridge St. Patrick's Day Committee.

A Womens' Safety March will be held Saturday, Feb. 4, and be followed the next weekend by a self-defense workshop at the Graham Parks School, on 15 Upton St. Similar events were held last year following a rape on Brookline Street last spring and a rape on Pearl Street in October. No suspects in the cases have been apprehended, said neighborhood activist Peggy Lynch.

It is being sponsored by the Womens' Commission, Latino Commission, Haitian Commission, Peace Commission, the Womens' Center on Pleasant Street and the Violence Prevention Task Force. Lynch said activists will also be working toward legislation that would improve public lighting and home security.

CITY WEEKLY / CAMBRIDGE NOTES

The Board of Directors of the Cambridge Chamber of Commerce has unanimously voted to endorse an all-inclusive parade proposed by the Cambridge St. Patrick's Day Committee.

The parade, which is being organized by a group of business owners led by Druid Pub owners John Flaherty and Pedro Smyth, will be held March 12 and will feature Macnus, a community theater group from Galway, Ireland.

Women to march, hold workshop

A Womens' Safety March will be held Saturday, Feb. 4, and be followed the next weekend by a self-defense workshop at the Graham Parks School, on 15 Upton St. Similar events were held last year following a rape on Brookline Street last spring and a rape on Pearl Street in October. No suspects in the cases have been apprehended, said neighborhood activist Peggy Lynch.

"It's really important for women to feel organized and to let potential perpetrators know that we are paying attention to this, and we haven't forgotten," she said.

The march starts at 4 p.m. from Grace Church, 56 Magazine St. and ends with a rally at City Hall at 5:30 p.m.

It is being sponsored by the Womens' Commission, Latino Commission, Haitian Commission, Peace Commission, the Womens' Center on Pleasant Street and the Violence Prevention Task Force. Lynch said activists will also be working toward legislation that would improve public lighting and home security.

For more information, call the Womens Commission at 349-4697.

Aid to Reeves wins recognition

Jubi Headley, executive assistant to Mayor Kenneth Reeves, is fast becoming a familiar face in City Hall.

A native of Boston, Headley, who is 25, graduated from Boston Latin High School in 1987 and Vassar College in 1991 with a major in English and significant course work in anthropology and African American studies.

He previously worked at the Cambridge Substance Abuse Task Force and met Reeves through AIDS-related work. In August, Headley succeeded Richard Buery, now attending Yale Law School. Headley plans to return to school eventually for a law or public policy degree. But in the meantime, he says he's happy where he is.

"My job is demanding and frustrating, but I wouldn't trade it for anything in the world," said Headley, who earns an annual salary of \$27,500.

Dance Complex planning brunch

The Dance Complex at 536 Massachusetts Ave., will host a potluck brunch from 10 a.m. to noon Feb. 5 for community members to greet new and returning studio occupants, learn of new programs, renovation proposals, fund-raising goals, and to share ideas.

Adult Modern Dance classes are available Tuesday through Saturday mornings for \$8. Courses in ballet, tap, Afro-American and Capoeira are also offered, as are after school programs.

Everyone is welcome and is asked to bring food to share, and to submit agenda items before Feb. 2. For more information, call 547-9363.

Lavender Alliance to sponsor forum

The Cambridge Lavender Alliance is sponsoring a forum on the implications of a recent court decision in Hawaii that may allow couples of the same gender to marry.

The forum, "Same Sex Marriage?" will be Friday, Feb. 10 from 7 to 9 p.m. at the Cambridge YWCA, 7 Temple St., Central Square. Low-cost child care will be offered to those who request it by Feb. 1. A small donation will be requested at the door, but all will be admitted regardless of ability to pay.

Five speakers will discuss the legal implications in Massachusetts of the Hawaii case. For more information, call 576-2455.

Why snow falls are a bummer

Here are some snow facts from the Department of Public Works:

Hours taken to clear all sidewalks after a storm: 8 to 12.

Cost of one dump truck with plow: \$85,000.

Miles of streets in Cambridge: 125 .

Miles of sidewalks: 225.

Total 1993-'94 winter expenses: \$1,236,670.

Top recyclers to be honored

Do you know someone who recycles everything but the kitchen sink? The Cambridge Recycling Program wants to hear from you.

Nominations are being accepted for the city's first annual recycling awards in the following categories: outstanding individual; extraordinary business; impressive large building (over 13 units); exceptional commercial building maintenance staff; notable citizen volunteer; and best city building or school program.

The nominee's name, and a brief description of his or her accomplishments should be sent to the Cambridge Recycling Program, 147 Hampshire St., Cambridge, MA 02139. Include your name and telephone number. Only Cambridge residents, businesses, employees of Cambridge businesses or large buildings are eligible. Nomination deadline is Feb. 15.

Winners will be honored at a ceremony in the spring. For more information, contact Jan Aceti at 349-4866.

Pembroke Pines

A gleaming new fire engine should be available for fighting fires in the eastern area of the city by the first of the year.

City commission recently, unanimously and without discussion, agreed to spend \$271,584 for the 1997-model pumper to be based at the station on Southwest 72nd Avenue on the east side of North Perry Airport.

The truck will replace a 1985 pumper that will be placed on reserve status, Fire Department officials said.

The purchase gives the city five front-line engines operating out of five fire stations.

Election of officers set

The Southwest Broward Republican Organization will do something that is second nature for political groups: It will conduct an election Monday.

The club will meet at 7:30 p.m. in Room 513 of the Walter C. Young Resource Center, 901 NW 129th Ave. The election of officers to one-year terms is the only item on the agenda, outgoing president Kevin Tynan said.

Positions to be filled are president, vice president, treasurer, recording secretary, corresponding secretary and three board seats.

Call Tynan at 954-432-7247 for more information.

Davie

Consider exotic pets

People interested in acquiring a pet more exotic than a dog or cat will have an opportunity today in Tree Tops Park, 3900 SW 100th Ave.

The holiday reptile and amphibian expo, set from 9 a.m. to 4 p.m., will offer a chance to buy reptiles, amphibians and pet supplies, and to hear presentations.

Admission will be \$2 for adults and free for children 12 and under. Call the park at 954-370-3750.

Region

Recycling grants awarded

The Broward County Commission awarded nearly a half-million dollars in grants to promote and help pay for recycling programs in 26 cities, including Pembroke Pines, Miramar, Davie and Cooper City.

The commission, acting on the recommendations of the technical advisory committee and the resource recovery board, approved the allocation of \$478,098 from the Florida Department of Environmental Protection.

Among cities receiving grants are: Cooper City, \$9,602; Davie, \$19,139; Miramar, \$15,565 and Pembroke Pines, \$30,823.

In addition, the county will spend \$1 million in grant money on operating costs of its materials recovery facility and \$750,000 to promote recycling, produce educational materials, and pay for administrative costs.

Correction published April 29, 1997. Glastonbury retailers and the Glastonbury Chamber of Commerce sponsored an Earth Day celebration Saturday at the park at Hebron Avenue and Main Street. Information on its sponsorship was incorrect in a brief on Page B3 Saturday.

– Today is your last change to correctly identify all 12 birds nesting inside local stores for a prize.

The birds were placed inside the stores by the Glastonbury Chamber of Commerce and local Realtors in celebration of Earth Day.

"It's not often that you will see an eagle nesting inside of a building," said Jane Hendricks, the chamber's program coordinator.

Prizes will be given to people who locate and name all the birds at 2 p.m. Saturday at the park at Hebron Avenue and Main Street.

Residents should not be afraid to ask for help if they don't know the name of the birds, Hendricks said.

The purpose of the event is to show the public that local Realtors are "earth friendly," Hendricks said.

The participating stores are: Glastonbury Stationers; Ooh's & Oz; Dow Quality Interiors, on Hebron Avenue; Emmy Lou's LTD; Daybreak Coffee Roasters; Photo Graphics; Village Wool; Katz Hardware and The Main Frame and Art

RQT=309&VInst=PROD&VName=PQD&VType=PQD&Fmt=3&did=000000091072783&clientId=196

Abstract (Article Summary)

In early 1992, [John Schneider], who also owns E. Schneider & Sons salvage yard at 7th Street and Sumner Avenue, Allentown, approached police with a theft reporting system that makes it easier to track down stolen goods that could be turned into scrap metal.

Allentown Detective Sgt. Joseph Hanna was all ears. Since 1990, Hanna had noticed an increase in Lehigh Valley thefts and burglaries that coincided with the rise of scrap metal prices.

So far, Hanna and Schneider say Fax-net has led to about a dozen arrests and curbed the theft of scrap metal.

Full Text (563 words)

Copyright Morning Call Jan 3, 1994

Last March, Allentown police charged John Leslie Binder, 49, of Lehighton, with stealing \$600 worth of aluminum wire from a supermarket under construction on Lehigh Street.

He was nabbed while trying to sell the aluminum as scrap to John Schneider's H. Blinderman & Sons salvage yard at 1320 Whitaker St., Hellertown.

Although Binder's crime is hardly material for "America's Most Wanted," it is one of several in the past two years that police say probably would not have been solved without Schneider's help.

In early 1992, Schneider, who also owns E. Schneider & Sons salvage yard at 7th Street and Sumner Avenue, Allentown, approached police with a theft reporting system that makes it easier to track down stolen goods that could be turned into scrap metal.

Allentown Detective Sgt. Joseph Hanna was all ears. Since 1990, Hanna had noticed an increase in Lehigh Valley thefts and burglaries that coincided with the rise of scrap metal prices.

"They were stealing anything of value that could be cut up and sold to area scrap dealers," Hanna said. "A few years ago when the price of brass was up, people were stealing the brass caps from oil fillers on houses in Center City Allentown."

And unless police called every scrap dealer in the area, there was little chance of retrieving stolen property before it turned into another hunk of metal in an area scrap yard, Hanna said.

Schneider said police more often than not would ask him about stolen goods too late.

"The police would come looking for something that had already been scrapped," Schneider said.

So in spring 1992, Schneider and the police department started the Fax-net program.

Under Fax-net, police alert Lehigh Valley salvage yards via fax of thefts involving anything that could be turned into scrap. The scrap dealers post the faxes at their weigh stations, where customers come to cash in recyclables.

"Now when something is stolen we are immediately on the lookout," Schneider said.

So far, Hanna and Schneider say Fax-net has led to about a dozen arrests and curbed the theft of scrap metal.

"We've all but killed the market for stolen recyclables," Schneider said. "It is a great way to show our customers that we want to deal with this problem."

Hanna said the program also has increased awareness among scrap dealers.

"A dealer will call me if he sees someone coming around with questionable material," Hanna said. "This gives us a chance to nab the guy before he takes something of real value and turns it into nickel-and-dime scrap material."

About 30 area scrap yards have pledged to support the program, and police departments in the program include Bethlehem, Whitehall Township, Emmaus, Catasauqua and South Whitehall Township.

Sgt. Barry George of Allentown's Crime Prevention Unit said the program's costs are minimal. When a report comes in, he faxes it to Schneider, who distributes it to other dealers.

"With scrap yards so widespread across the valley, this is the only way to get the reports out in time," George said.

Hanna said other cities have similar programs, and he hopes to expand the Lehigh Valley's Fax-net into Philadelphia.

"We want to catch those who would be savvy enough to avoid the Lehigh Valley network and go to Philadelphia," Hanna said.

Abstract (Article Summary)

Guess what else we learned? Austin botanist Molly Ogorzaly, whose family entered our vegetable and fruit carving contest, told us that pumpkins are kind of a Johnny-(or should that be Jack-o'-lantern?)-Come-Lately in the carving world. Way before pumpkins became the carving medium of choice, folks used to put faces on turnips and rutabagas and put tiny lumps of coal in them. (Scary, eh?)

MOST ORIGINAL - "It's made entirely of organic carrots, this being Austin, of course," says Robert Harrington. That's how the 30-year-old Austin resident describes the lizard he made out of carrots. It may be a coincidence, but the color of his lizard is much the same as the school color of the University of Texas, where he is a graduate student. **SCARIEST/MOST ALARMING** - His very first effort at carving a squash turned out to be a winner for Todd Langley, a 31-year-old Round Rock resident. Langley says he calls his creation "Screaming Squash." The artist says his favorite Halloween memory was walking down Sixth Street dressed as a Hawaiian hula lamp.

Most Original: organic carrot lizard by Robert Harrington. // **Best Overall:** tall squash by [Pedro Flores]. // **At left, Scariest/Most Alarming:** 'Screaming Squash' by Todd Langley. **Prettiest:** habenero pepper by [Ed Blake]. // **Contestants** used a variety of veggies and fruits to create stunning results. The large blue [Hubbard] squash at right won the **Best Use of Power Tool** honor. The pineapple at left was named **Best Use of Fake Body Parts** for its finger-

pointing decorations. And the orange just to the front and left of the glowing coconut won the recycling award. It was destined for the trash but came to us instead. // This group of smiling faces was created by [Sarah Rosanky]'s first-grade class. Copyright Austin American Statesman Oct 30, 1993

Obviously some mothers never told their children not to play with their food.

We're glad.

That's because many of our readers helped the American-Statesman put a different kind of face on Halloween this year.

We panicked momentarily when we heard there was going to be a national shortage of pumpkins because of severe weather conditions around the country, so we asked you to show us how to come up with some alternatives.

As it turns out, Texas has an adequate supply of pumpkins although they may be a little bit more costly than in the past. But we now have all kinds of new ideas for you if ever you do find yourself without the traditional orange orb.

And guess what else we learned? Austin botanist Molly Ogorzaly, whose family entered our vegetable and fruit carving contest, told us that pumpkins are kind of a Johnny-(or should that be Jack-o'-lantern?)-Come-Lately in the carving world. Way before pumpkins became the carving medium of choice, folks used to put faces on turnips and rutabagas and put tiny lumps of coal in them. (Scary, eh?)

Anyway, we were overwhelmed by reader response - as were the folks in our photo studio, who were treated to an aroma resembling a cross between V-8 juice and a Hawaiian luau.

All of the entries - which included some intricate designs - deserve recognition, agreed our judges, selected at random from among newsroom employees.

We want to thank all our participants. We realize the contest probably made for skimpy fruit salads and vegetable soups at their homes last Sunday. Special thanks also go out to Carl Williams and the kitchen staff of the Tom Thumb Supermarket at 3300 Bee Caves Road, who provided an array of outstanding fruit and vegetable creations to publicize our contest.

We only wish we could have put the winning entries on permanent display somewhere. But you know how that goes: The fruit flies would have been unbearable after a week or so. (By the time judging began, one acorn squash already resembled penicillin despite our best efforts to save it.)

Here are our choices, made after careful consideration - not to mention the knowledge that all of the entrants evidently own sharp knives and power tools. We did vote quickly, however. As contests go, this one has a very short shelf life.

Major awards

BEST OVERALL - A tall squash with bloody fangs submitted by Pedro Flores, a 26-year-old chef with Daggar Catering. Flores is accustomed to making unusual creations. He is an ice sculptor and makes all sorts of organic art for different events.

MOST ORIGINAL - "It's made entirely of organic carrots, this being Austin, of course," says Robert Harrington. That's how the 30-year-old Austin resident describes the lizard he made out of carrots. It may be a coincidence, but the color of his lizard is much the same as the school color of the University of Texas, where he is a graduate student. **SCARIEST/MOST ALARMING** - His very first effort at carving a squash turned out to be a winner for Todd Langley, a 31-year-old Round Rock resident. Langley says he calls his creation "Screaming Squash." The artist

says his favorite Halloween memory was walking down Sixth Street dressed as a Hawaiian hula lamp.

PRETTIEST - This was the most heated competition, but 40-year-old graphic artist Ed Blake was leader of the pack with a multi-colored Habenero pepper that he found in his back yard.

Other awards

BEST FAMILY PROJECT - Mae, William, Bob and Molly Ogorzaly of Austin entered the tallest project, which can only be described as a "mixed media" pineapple head. It had several types of vegetation, including a tree branch body. (Get it? Family tree?) The family ranges in age from 19 months to 42 years old, they said.

BEST USE OF POWER TOOL - Folks at the Heart of Texas Produce, 1305 E. Sixth St., used a power drill to give a blue Hubbard squash a new look. "This was incredibly hard to carve - probably why Hubbard squashes aren't normally used as jack o'-lanterns," said one employee of the produce company. **CLASS AWARD** - A runaway favorite was Sarah Rosanky's first grade class from Linder Elementary School in South Austin. Rosanky says she's invited her entire class to her house for the holiday this year. She confessed that the "self-portrait" of her classroom wasn't done entirely by the students. "They drew the faces and I did the cutting," she said. "They can't use sharp objects."

RECYCLING EFFORT - Ian Herman, 5, and his mother said their entry was an act of conservation. "We were cleaning out the refrigerator and it was either throwing away this orange or recycling," they said.

BEST USE OF FAKE HUMAN BODY PARTS - A popular choice (probably because it was the only one we got) was the pineapple topped with bloody fingers entered by Carolyn Moyle, 9, who attends Kirby Hall School in Austin. "We worked hard on it," she said. (At least we hope they were fake body parts, come to think of it. The carving implements they use to make these things are pretty sharp. Are you OK, Carolyn?) **BEST CARVING COMMENTARY** - John Strahm, Andy Strahm, and Jake Miller gave us four different creations, including an eggplant designed to resemble a local musician. Why were their carvings special? Their only response: "We did it and we're cool." We agree.

BEST EXCUSE FROM MOTHER - Judges were delighted with a goofy-faced eggplant but Racheal Morgan of Austin brought it by too late for top-prize consideration. "I was unable to get my daughter's entry in on Sunday," she said in a note she slipped to a newspaper employee. But we like it anyhow. **HONORABLE MENTION** - Since this contest was not for valuable prizes, but only a small measure of local glory, we thought we'd also shine the spotlight on: Sherrie Davis, Susan Evans, Cindy Goldstein, Derek Kindschuh, Sherry Payne, Mac Ragsdale, Bailey Reue, Emily Marietta and Ruth Wickenberg.

Miguel Martinez Bustos was awarded the Holy Names College Founders' Medal. Bustos was chosen for his academic excellence and campus leadership. Bustos was involved in student government and was president of the Associated Students of Holy Names College. He was an intern at the World Affairs Council of Northern California and developed and coordinated a program on the North America Free Trade Agreement.

Jamiellin Kelsey of San Leandro is a winner of the United Nations Association of the USA's nationwide high school essay contest. The 10th grader attends San Leandro High School and won for her work on the topic, "A New U.N. Priority: Putting People First in Sustainable Development." Kelsey addressed the plight of the Philippines.

The Concord Naval Weapons Station will give a high school senior a day to be commanding officer. Bob Hawkins, a student at Olympic High School in Concord, was selected by his school for community service and outstanding work as a school site counselor. Hawkins is a member of the newspaper staff and addresses issues on ecology. He will spend tomorrow working with Captain Alan M. Nibbs, the station's commanding officer.

Memos - n Du Page Talk.

S.R. Carroll.

One good read deserves another: Technically, Sam Hemberger didn't think his shop fit into a recycling category.

But the League of Women Voters in Batavia did. It recently presented him with one of its eight annual "Green Awards" recognizing recycling efforts.

It put his used bookstore, The Book Nook at 241 W. Wilson St. in Batavia, right up there with the big corporations that collect aluminum cans or newspaper, he said.

In fact, he said the league stated his recycling was extra special, since it was 100 percent efficient, requiring no additional energy to transform the collected materials into another medium. Books can be reused just as they are.

Since his award, people have been clearing out their basements and attics and bringing in even more books.

"We receive about 1,000 books a month," he said. "And it's apparent from their condition, some have been gathering dust."

Not all the people who bring in books check out new ones.

"The majority of folks who take something out will recycle with us," said Hemberger, "but about half of the books come from one-time impulse returners we may never see again."

Abstract (Article Summary)

Because the Solid Waste Disposal Committee is prohibited by law from using the money it receives for its recyclables, it donates the money to the Boy Scouts, Cub Scouts, PTOs and other groups that take turns helping with the drives.

Executive Secretary Michael Finglas said the drives have saved the town a significant amount of money. For every ton of newspaper the group collects, the town saves \$50, the amount Browning-Ferris Industries charges Swansea per ton to dump at its landfill in Fall River.

At last month's drive, the group collected 26 tons of newspaper, 4 tons of glass, 1,000 pounds of plastic and tons of other recyclables. People were lined up in cars waiting their turn to drop off their recyclables. The most recent drive was this past weekend.

The only time Susan Ambroziak uses disposable diapers on her 2-year-old son is when they're away from home.

She likes the thought of doing her part to save landfill space by using cloth diapers whenever she can.

Mike Medeiros, on the other hand, is not big on environmental issues. But he recycles because he believes in helping the town save money.

"Sue and I don't always agree on everything. She's more into the environment," Medeiros said. "I'm more into the practical side of things."

Says Ambroziak, a School Committee member: "I'm just concerned about what's happening to the environment. I've always been that way. I think it's the natural thing to do."

Although Ambroziak and Medeiros have different views on the environment, they have combined their energies as members of one of the town's most respected volunteer groups.

The Solid Waste Disposal Committee was formed nearly two years ago in part because of a suggestion by Selectman Donald LeSage, who was looking for ways to cut down on the town's trash bill.

"We had to do something to start recycling," LeSage said. "It was costing us too much to dump in the landfill and it still is."

Thanks to the Solid Waste Disposal Committee, the town's trash bill is declining.

Each month the group holds a recycling drive and encourages residents to bring their old newspapers, aluminum cans, plastics, glass, brass, copper, corrugated cardboard and other recyclables to the Highway Department.

The group has been able to get private recycling companies to haul the recyclables away. The companies pay the committee for each ton that is collected. For example, one company pays the group \$10 a ton for newspaper.

Because the Solid Waste Disposal Committee is prohibited by law from using the money it receives for its recyclables, it donates the money to the Boy Scouts, Cub Scouts, PTOs and other groups that take turns helping with the drives.

Executive Secretary Michael Finglas said the drives have saved the town a significant amount of money. For every ton of newspaper the group collects, the town saves \$50, the amount Browning-Ferris Industries charges Swansea per ton to dump at its landfill in Fall River.

"They're doing a great job of saving us a tremendous amount of money," Finglas said. He estimated that the

savings reach \$100,000 a year.

Solid Waste Disposal Committee members want more people to become involved in preserving the environment. So far, their efforts appear to be working.

At last month's drive, the group collected 26 tons of newspaper, 4 tons of glass, 1,000 pounds of plastic and tons of other recyclables. People were lined up in cars waiting their turn to drop off their recyclables. The most recent drive was this past weekend.

But the committee's work is not without its problems.

"We've got 11 people trying to recycle for the whole town," Ambroziak said. "It's getting to be too big and every month we find ourselves trying to get more volunteers."

"They're a hardworking group," LeSage said. "But we need to get some new blood because the volunteers are not going to be there forever."

LeSage said he hopes the town will eventually be able to take over for the group.

That could be arranged soon. The state Department of Environmental Protection recognized the Solid Waste Disposal Committee for its recycling efforts by giving it \$12,000 to buy containers in which to store recyclables until they can be hauled away.

To receive the containers, however, the town must establish a mandatory recycling program, the state said.

Finglas said an article at the annual Financial Town Meeting on May 20 will ask voters to approve an ordinance that would establish a recycling center on town land near the old Sears Farm.

Abstract (Article Summary)

In Lehigh County, recycling programs already have been started by Whitehall Township, Allentown and Bethlehem. Based on reports of high compliance in those areas, [David Carleton] said he expects the Salisbury program to be successful.

Starting the recycling program cost Salisbury \$49,977, Carleton said. The state Department of Environmental Resources awards grants to help with recycling and awarded Salisbury \$44,977, to cover 90 percent of its cost.

PHOTO by BOBBY ROE, The Morning Call CAPTION: Ready for recycling, right to left: Clifford Steff, Salisbury manager, David Carleton, Salisbury administrative assistant, and [Mark Cesare] and Ron Caldarelli of Hinkle Hauling Services. Behind them are the 4,500 recycling bins that Salisbury residents will receive tomorrow.

Full Text (621 words)

Copyright Morning Call Jun 17, 1990

The first phase of mandatory recycling in Salisbury Township will begin tomorrow with the delivery of 4,250 deep blue bins to hold glass and cans.

Starting July 2, the township's trash hauler, Danella Environmental Technologies of Allentown, will collect glass containers in any size or color, and tin, metal and aluminum cans. The 18-gallon bins will be placed along the curb in front of houses in the township.

Residents also are encouraged to recycle newspapers, plastics and other items, but they must take those materials to recycling centers themselves, said David Carleton, Salisbury administrative assistant.

In Lehigh County, recycling programs already have been started by Whitehall Township, Allentown and Bethlehem. Based on reports of high compliance in those areas, Carleton said he expects the Salisbury program to be successful.

"We've been getting a lot of calls from residents who are anxious to get started," he said. "We think it's going to go really well."

Under Act 101, passed by the state Legislature in 1988, municipalities are required to develop recycling programs to decrease the flow of solid waste in the state. One of the goals is to recycle at least 25 percent of all the state's municipal waste by Jan. 1, 1997.

Carleton said residents will receive the bin, a lid, and a brochure explaining the program. A "Salisbury Recycles" bumper sticker also will be included in the delivery, he said.

Recycled materials will be collected Mondays, Tuesdays and Wednesdays, on the first day of residents' two-day collection periods, Carleton said. Because of the July Fourth holiday, residents with Wednesday collection will begin recycling the following week, on July 11.

Glass containers and cans should be rinsed out with lids removed for collection, said Carleton, who coordinated the township's recycling program.

Mark Cesare, resource development manager for Danella, said haulers will separate the glass and cans at the curb using a compartmentalized truck. The company decided which recyclable materials would be collected from a larger list of recyclable materials, including newspaper and plastics. The glass and cans the company collects will be sold for other uses.

Danella will also pick up glass and cans from Lower Macungie, Cesare said. A curbside program will start there later this year.

Starting the recycling program cost Salisbury \$49,977, Carleton said. The state Department of Environmental Resources awards grants to help with recycling and awarded Salisbury \$44,977, to cover 90 percent of its cost.

The cost for collecting the materials is included in the residents' annual \$182 trash collection fee, Carleton said.

The township can cite individuals for not participating in the program. A cited individual would then go before a magistrate who would determine the amount of the fine, which can be up to \$500 plus legal expenses, Carleton said.

Residents will be given several weeks to get used to the program, Carleton said, and collection crews will attach tags to the bins belonging to people who are not following instructions. The tags will indicate what the person is doing wrong, he said.

"We're not going to be tough on people right at the start," Carleton said. "The idea is to encourage as much

voluntary compliance as possible."

Cesare said Danella also had received calls about the recycling program. Billboards, mailings and newspaper articles about existing recycling programs had helped to increase knowledge and curiosity about mandatory recycling, he said.

"With all the publicity Allentown and Bethlehem have generated, I think it's only going to help with Salisbury."
